"Somebody Somewhere"

Visit "[Somebody Somewhere](#)" on MotoLyrics.com

Every lover knows this song too well
finding out who's love they need
Some can sing it and some can tell
others just can't find the key.

There is a magic that lasts through time
Some fall under it's spell
I hope that someday the future is kind
So I can finally tell

Somebody, somewhere, that they mean the world to
me
I hope that somebody somewhere, can set this heart
free
I know that somebody somewhere can show me the
way
Love can be- I know that somebody somewhere is
waiting for me.

If I could have any wish on a star
in a world where that dreams do come true
My wish would find you wherever you are
So I can finally say to

Somebody, somewhere, that they mean the world to
me
I hope that somebody somewhere, can set this heart
free
I know that somebody somewhere can show me the
way
Love can be- I know that somebody somewhere is
waiting for me.

I know that somebody somewhere can show me the
way
love can be- I know that somebody somewhere is
waiting for me.
