[Martin: the basic riff was picked up by Tim with the idea][of a subtle electronic sound a Tribute to technique][which

is fascinating and scary.]

[vers:]we have electronic toys

and electrnic pain

I hear a voice deep inside my brain

I hear you talkin' loud and clearly

"every step you're walking"

it said to me

but in the end

I wonder why

it's comin' back

[ref:]

we are belovers of fidelity

always forever on and on

[vers:]

I see a sign before my eyes

a sign that says: buy me

hear the awful cries

hear what will be

I see a sign that says: buy me

[ref:]

we are belovers of fidelity

always forever on and on

who knows if that is our fate maybe

our fate to overdo fidelity...?

[vers:]

don't care

care about ambition

this is your aim

this is your mission
