You complicate my every thought  
Your words are chosen, not just spoken  
They comfort me in the strangest ways  
You're hard to catch in any light  
The sun reflects you back to night  
And I can't even hold you for one day

Chorus:  
So flutter in, turn me on  
I'll chase you till my heart is gone  
Black butterfly

A shadow here, a picture there  
All at once you're everywhere  
You touch and go then hover in the air  
I love you cause you're dangerous  
The blood that gives my head a rush  
Is pumping much too fast but I don't care

Chorus

Oh wake me, take me black butterfly  
Oh bleed me, need me black butterfly
