Dark eyes come down on you  
Whisper your name so sweet  
Cold lies break from her lips  
You don't feel the heat

There ain't no time to settle down  
You're living on shaky ground  
If that's what love is all about  
There's only one way out

Somewhere on a distant street  
You're caught between the tigers  
If you're walkin' on fire don't burn your feet  
You're caught between the tigers

Sharp words cut down your spine  
They stand in circle strong!  
Be still in silent fear  
For they'll soon be gone  
They disappear before the dawn  
Gonna disappear!  
C'mon, c'mon

There ain't no people you can trust  
This city's been stained with lust  
If that's what life is all about  
There's only one way out

Somewhere on a distant street  
You're caught between the tigers  
If you're walkin' on fire don't burn your feet  
You're caught between the tigers

[Solo]

Somewhere on a distant street  
You're caught between the tigers  
If you're walkin' on fire don't burn your feet  
You're caught between the tigers
