"Me And I"

Visit "[Me And I](#)" on MotoLyrics.com

Saw myself talking to myself
Like there were several of me
We have conversations
We disagree on many things

We discuss life, we discover truth
Though we don't always see it
Everything we know is everything
We know is everything

Chorus:
I and me, me and I
I and me, me and I

Flesh is not who we are anyway
A lie that undoes our intentions
Until we remember we're puppets
For preachers of our decline

Chorus

What if I, what if I just let me go
Forgive myself and what I don't know
What if they still beat me down when I'm strong
Can I get back to the place I belong
I belong...

Saw myself talking to myself
Like there were several of me
We have conversations
We agree on many things
