"Satellite"

Visit "[Satellite](#)" on MotoLyrics.com

You think you've got it made
With all the money you saved
For that one rainy day
You've got a brand new car
You're feeling just like a star
And well maybe you are

If I had a satellite
I would tell the world tonight
And shout through the sky
We're living a lie

Cocktails and cigarettes
Late nights and sometimes regrets
That you'd just soon forget
Got all the things you need
The big machine that you feed
Yeah cause we all agreed

If I had a satellite
I would tell the world tonight
And shout through the sky we're living a lie
There's no need to analyze
Think too much we're paralyzed
It's time to get free, ah c'mon get free
If I had a satellite
I would tell the world tonight
And shout through the sky we're living a lie
There's no need to analyze
Think too much we're paralyzed
It's time to get free, ah c'mon get free
