One of these days I'm gonna shed my skin  
Become somebody who i might have been  
Look outside and jump right back in  
The very next day  
Like a radio song stuck in my brain  
Another trip down my memory lane  
You can leave me here, but don't leave me the same  
And fly away, fly far, far away

[chorus]  
Every single breath i take  
Radiates, Radiate  
Every moment I'm awake  
Radiates, Radiate

As i grow up i want to smile at doubt  
And look back here where it all came out  
I learned what it was all about  
It was clear as day

Always been one to hold things back  
Never could shake the dreams i lacked  
Now i see they've all been sacked  
And they slip away, they slip far, far away

[chorus]  
Every single breath i take  
Every moment I'm awake  
Till i meet you face to face  
Radiate

As i try to find my way  
All the plans and moves i make  
At the end of every day  
Radiate, Radiate
