I shore like that jive,
Lay it on me
You could make a hurricane
Write a sonnet
Dark clouds disappear with every word I hear
When you're talking like this, you're speakin' through
love's lips
When you're talking like this, you're speakin' through
love's lips

Just the tone of your voice gets me hopin'
There's more than just the words
that are spoken.
Like food for my soul
I want all that I can get
When you're talking like this, you're speakin' through
love's lips
Yeah, when you're talking like this, you're speakin'
through love's lips
