I remember that lonesome night  
When stars all were shining bright  
I was alone, alone until  
Until I saw that moon coming over the hill

Now how could I ever have the right  
To see alone such a beautiful sight  
You know that night falls dark and still  
Except for that moon coming over the hill

Now it looks so close up next to the clouds  
Well, you know it's up there, just checking me out  
It just rises higher on into the night  
And it lets me know everything's alright

So don't you worry about where I been  
I'm just checkin' on one of my old friends  
You know every night I get my fill  
When I see the moon coming over the hill

I say, every night I get my fill  
Seeing you and the moon coming over the hill
