I.com

your a million miles away u drift away every day it  
seems that i cannot go on

for not that long wish these boundaries

wich wont allow us 2 be separated for these long  
spaces of time as it unwinds

hours

your a million miles away as are love drifts

away theres nothing left 2 say but that your a million  
miles away

it seems like im at 1 side of earth and your

at the next for whom are love seems 2 go on i wish i  
could see u again but u

drift further and further away wich brings me down 2  
once a happy now a sad day

hours

you're a million miles away as are love drifts

away there's nothing left 2 say but that you're a million  
miles away

you're a million miles away

you're a million miles away

you're a million miles away
