Only love can make you feel this way- indeed
It takes away the loneliness and pain-each day
You can measure all the things you feel-inside
To the way you felt before you tried-to love

How could it be that we've come so far
To bring you here to me now

Tell me can you feel my touch
Hold me close and hear me say
Only a moment away

Look at all that we have done together
Watching all the time that's passed us by so far

How could it be that we've come so far
To bring you here to me now

Tell me can you feel my touch
Hold me close and hear me say
Only a moment away
