It feels lonely out tonight  
Look at the window, can you see a thing?  
An hour back since two weeks  
It's after five and I can't see outside  
What will the next bring to the left  
Why'd you say a word?

One day I'll find this town out  
One day I'll find you out of this town

And everything that goes on is more distant than  
before  
Goodnight, good fight  
And everything that goes on is more distant than  
before

One day I'll find this town out  
One day I'll find you out of this town

Taken away never to be heard again  
Like a misty shadow in the sun  
Here comes the overcast
