Music & lyrics: Hansen, Sielck

Do you believe in justice

Or so-called co-existence?

What's wrong with politicians?

They give their best for you

The economic's growin'

Some tiny holes above

A little radiation

Wake up this planet fades

Bridge:

You are not watching, you're part of the show

You lost the first prize a long time ago.

Prehours:

WAR - somebody's always starts again

HATE - we're getting closer to the end

Chorus:

As time goes by

(We never seem to beat the ones

Who say we can't be free)

As time goes by.

Do you believe in money?

Do you believe in guns?

Do you trust the press, babe?

You'd better judge yourself.

Bridge - prechorus - chorus

The missiles are launching, the tanks are rollin'

The guns are blazing, the sky turns black!

Prechorus

Chorus:

As time goes by

We never seem to beat the ones

Who say we can't be free

As time goes by

We're getting closer to the end of our ability

As time goes by

Is there a place to run for shelter in a high tech war

As time goes by

Can you believe and trust in God

To help you from above.
