I want to hold you
Like the sky loves to hold the stars
I want to kiss you
You know I'd rather do nothing else
I love your blue eyes
More beautiful than gems
I love your smile
Makes me feel so good

You could spend eternity
In my arms
Just one problem
Eternity's too short

You are the only one
That I have truly loved
You are the only one
That I will ever love
You could spend forever
Together with me
Our love's eternal
I don't care what they say

You could spend eternity
In my arms
Just one problem
Eternity's too short

I love you (x4)

You could spend eternity
In my arms
Just one problem
Eternity's too short

yeah
yeah
