Your a liar you wear a gun makes you look bigger  
You scare the crowd but jump your smarter  
Like a little kid you play with fire  
You do your pot you do it all

(Chorus)

But those words from your mouth they are scary  
And the hate that you have that you carry  
And will grow and will grow till we're buried

Your so clever if this is war it's like no other  
If there is blame it's on each other  
I hear the cries they last forever  
We did our part we came along

(Chorus)

But those words from your mouth they are scary  
And the hate that you have that you carry  
And will grow and will grow till we're buried  
And there will be nothing left except sadness  
And a scar without words without anything  
Cause we've done this before this is madness

(Chorus)

But those words from your mouth they are scary  
And the hate that you have that you carry  
And will grow and will grow till we're buried  
And there will be nothing left except sadness  
And a scar without words without anything  
Cause we've done this before this is madness

This is wrong this is us this is happening  
But we've done this before but we're standing  
We're still standing and we've done this before  
But we're standing we're still standing  
And we've done this before but we're standing
