I held my head as it left the ground
The belts grew tight as the blast grew load
A loving wish whispered in my ear
Please lead with grace, all the best, my dear, yeah, it's
like

I held your hand as I pulled you in
Your lips sealed tight, ready to begin
I kissed you first, then you kissed my ear
If I ask you once will you ask me every year?

Do you feel alive? Imagine, imagine
Do you feel alive? Imagine, imagine

The sun it set in the night time sky
The stars they cast a glow upon my eyes
The earth itself a burning ball of light, yeah, it's like
And our first love was ignited late that night

Do you feel alive? Imagine, imagine
Do you feel alive? Imagine, imagine

The stars in your eyes light up the sky
With thoughts, light and fire and sound
The stars in your eyes light up the sky
With thoughts, light and fire and sound

The stars in your eyes light up the sky
With thoughts, light and fire and sound
The stars in your eyes light up the sky
With thoughts, light and fire and sound

The stars in your eyes light up the sky
With thoughts, light and fire and sound
The stars in your eyes light up the sky
With thoughts, light and fire and sound
