

## Talib Kweli "Midnight Hour"

Visit "[Midnight Hour](#)" on [MotoLyrics.com](http://MotoLyrics.com)

When I get home, unplug the phone  
Turn out the lights, I serve this song

I'm gonna call my baby  
Tell him that I'm coming  
See, I been gone for way too long  
He needs some lovin'

See last night on the phone  
He told me that he missed me  
And I listened to his song  
It sounded kinda sexy

Check it out, I said, um, I said

My baby on the job, I know she's workin hard  
She independent and I love that show, I swear to God  
The way she get up, I know she ain't really got no fear  
No, I don't make it rain, but still I'm the one that got her  
bed

I need her all at once, I been on tour for months  
Her body like a stage, as soon as I hit, I tore it up  
She love how I perform, come get a hype like her  
favorite song  
We riders of the storm, touch me, baby, like the dawn

Ooh, said I just can't wait till the nighttime comes  
And I see my baby  
Ooh, said I just can't wait till the midnight hour  
And I see my, I'll be home tonight, I'll be by his side

Listen, can't wait till the night begin, can't wait to let her  
in  
Ready to handle this, the candle's lit, the light's is dim  
So dark be inner vision and she might lose her and  
inhibitions  
Hourglass figure make it last past ten  
Four hours last long no inhibition

I'll come every once in a while  
Just to let her know her love in town

I'm here to stay so there ain't no way  
I know she love the sound of that

I'll make her love come down to earth  
That's worth another round  
Can't take another clown, in love with the kid  
'Cause he underground

Ooh, said I just can't wait till the nighttime comes  
And I see my baby  
Ooh, said I just can't wait till the midnight hour  
And I see my, I'll be home tonight, I'll be by his side

Listen, somebody call my baby, say I'm on the way now  
See, I been going crazy thinking 'bout you late nights  
The way my heart reacts it lets me know I need him  
See, I been getting flashbacks, I just got to see him

Hopped out the taxicab, she almost didn't pay  
He let me get your bags, I got some things to say  
I know you miss me, girl, you know I miss you too  
We kissing taking turns, so let's go to the room

Ooh, said I just can't wait till the nighttime comes  
And I see my baby  
Ooh, said I just can't wait till the midnight hour  
And I see my, I'll be home tonight, I'll be by his side

Listen uh, when I get home, unplug the phone  
Turn out the lights, I serve this song  
He said when you get home, unplug the phone  
The lights is off, you know it's on, know it's on

Ooh, that I made it home, baby, lock that door  
And be ready for me  
Ooh, and it's been some months and we don't have  
long  
But I'm here now

I made it home tonight  
I'll be by your side  
Don't worry 'bout the time  
I made it home tonight, listen, uh
