[Gift of Gab]

I can do anything

Neutron, proton, mass effect, lyrical oxidation, yo
irrelevant

Mass spectrograph, your electron volt, atomic energy
erupting

As I get all open on betacron, gamma rays thermo
cracking

Cyclotron and any and every mic

You're on trans iridium, if you're always uranium

Molecules, spontaneous combustion, pow

Law of de-fi-nite pro-por-tion, gain-ing weight

I'm every element of brown

Lead, gold, tin, iron, platinum, zinc, when I rap you
think

Iodine nitrate activate

Red geranium, the only difference is I transmit sound

Balance was unbalanced then you add a little talent
and

Careful, careful with those ingredients

They could explode and blow up if you drop then

And they hit the ground

Let it flow, yo, just let it go, get back

C-O-H-O-2 wine water solution of calcium hydroxide

Slobbin it, C-A-O lime will make bleach powder

Galvanic metal beats stomp out louder

Dried ice, C-0 squared refrigerant

N-O-2 makes you laugh, it's laughing gas used by the
dentists

I nearly added acid glue, I'm like oil of a toil, the king
of chemicals

And the G heat gas waved all your mats

Chemical change, ice point, melt all your raps

Atomic weight, hold shocks, when you call

Refillable gas keep going way beyond

Biotch I'm only ill with buzzin, feel the ambiance
A diabetic process outta calm your ass
After I warm your ass, I'll give sodium, silicate N-O-2-S-
1-O-3, a water glass
Borax flexure full of brimstone sulfur
Borax acid, hip-hop preserver
C-O-2 could never put away the fire
Style aroma is scientific; the lyrical fuse would be
connected
To teach you chemical calisthenics

The Theory is that all matter is composed of at least
three fundamental particles
Protons, electrons, neutrons, Protons charge is positive
By now you've guessed electrons are probably
negatively charged
Neutrons don't follow either, neutral, in the middle,
only no apologies
Centered, unmoved by yin and yang ideology
Neutron, bomb songs, electron fury
Cosmic musical radio-activity
Different points in joints within infinity
Oxygen and hydrogen alive within all types of energy
Within all types of energy
Within all types of energy
Within all types of energy
Within all types of energy, inside a world, inside a
world
Inside a universe, inside of me existing although I can't
see it

Hydrocarbon, nitrogen cycle, ionization
Heavier than electric motor metals that weigh over a
ton
This has been a chemist, Blackalicious creation
Clean out your desk, put your papers away cause class
in almost done

This is chemistry plus calisthenics
I'm calcium plus potassium, magnesium, newspaper of
sodium, sulfate
Your solvent, chloroform, remedy from the norm
glycerin, purest form Titanium
there is no way out, when this newfy is out
of all arms vibration, forming in a nigga
some bleachin' to teach ya religious is equal to pieces
of meteor
Eager to be here or is it, can see here I know all of all
I'ma pickin' up pretty little Cindy
I'm more, I'm thinkin of more,
I'm cookin a potion!
