"Flesh And Blood"

Visit "[Flesh And Blood](#)" on MotoLyrics.com

I'm not that someone who's got what you want

I can do nothing but watch what you do

You just want someone to kiss you good night

But lips are never enough to get you through

You stole my nights and you got your way

Now you got me dying inside , oh baby

Ebony don't walk out on me

Listen to what I say

Pick up the pieces of my life into the night of day

How do you break this heart of steel

Nobody ever could

Open the pages of my life

I'm only flesh and blood

I'll be your Savior but baby I swear

I'm not living my life over you

Some satisfaction you get if you dare

But is it ever enough to get you through

You stole my mind and you watch me fall

Now you leave the scene of the crime, oh no

Ebony don't walk out on me

I never thought you could

I'm only what you make of me

I'm only flesh and blood

I'm only flesh and blood

When you're gone , you'll be leaving behind ,

a broken man with something to hide

Oh, lost in the night in a town without pity

You learn how to cry. You learn how to cry

(break)

Ebony don't walk out on me

Listen to what I say

Pick up the pieces of my life into the night of day

How do you break this heart of steel

Nobody ever could

Open the pages of my life

I'm only flesh and blood

Gone are the days that came and went

Houses are made of wood

Live in a world of sand and stone

I'm only flesh and blood

Ebony don't walk out on me

I never thought you could

I'm only what you make of me

I'm only flesh and blood
