Take the short way home (intro)

You've been makin' up your mind  
And I can save you from the trouble  
that your heart is goin' through  
And I can tell you what your  
future's gonna be  
Maybe we can open up your eyes  
Baby , you can't leave me now

There is lightning in the city  
Stranger than you ever saw  
Get back to your special lover  
And I won't ever turn on you or tell you  
You should tell me where you go

Just take the short way home  
Baby, take care of yourself  
In this world of evil  
I can keep you to myself  
Take the short way home  
You'll be safe her by my side  
In this world of evil  
I can keep you satisfied

And you can make it easy on yourself  
Some other love may call my name when you're away  
And I'll be gone  
There's no other who could ever love you more  
Keep talkin' to myself when I'm alone  
I don't want to be alone

Crazy people in the shadows  
Love is only what you find  
Come back here and you'll discover  
There ain't nothing you been searchin' for  
I could not give you now if you were mine

Just take the short way home  
Baby take care of yourself  
In this world of evil

I can keep you to myself  
Take the short way home  
You'll be safe her by my side  
In this world of evil  
I can keep you satisfied

(break)

Crazy people in the shadows  
Love is only what you find  
Come back here and you'll discover  
There ain't nothing you been searchin' for  
I could not give you now if you were mine

Must take the short way home  
Baby take care of yourself  
In this world of evil  
I can keep you for myself  
Take the short way home  
You'll be safe her by my side  
In this world of evil  
I can keep you satisfied

Take the short way home  
Baby take care of yourself  
In this world of evil  
I can keep you for myself  
Take the short way home  
You'll be safe her by my side  
In this world of evil  
I can keep you satisfied
