Come to me baby, I got something to say
I been changin' your direction ev'ry step of the way
Now I bring emotion and I bring desire
And I bring the potion to set you on fire
I know you need me, there can be no doubt
You got me held inside your love and I can't get out
We must surrender to the powers that be
The angel in you and the devil in me

Warm ride , warm ride , baby just the way you are
Warm ride , warm ride , we can reach the highest star

Now I warn you women, we are two of a kind
And we both know what's coming
We got one thing in mind
I bring the pleasure , satisfaction you learn
And I got the strength to make you burn, baby, burn

Warm ride , warm ride , baby just the way you are
Warm ride , warm ride , we can reach the highest star

Why are we waiting for this love on the rise
And why am I searching for the magic that's in your
eyes
We must surrender to the powers that be
The angel in you and the devil in me

Warm ride, warm ride , baby just the way you are
Warm ride, warm ride , we can reach the highest star

(break)

Warm ride , warm ride , baby just the way you are
Warm ride , warm ride , we can reach the highest star

warm ride (fade out)
