You

I can see the hands of time
Guess it's now my time to learn things I read in
storybooks
Forgotten what it's like to weep
My mouth is open , I can't speak
What good would shouting be
So unreal to me , the feeling when you said goodbye
What can I do now

So please come back to me
Don't end this life of mine
Without you here with me
I know I'm gonna lose my mind

My tears are hurting me
Just what am I supposed to do
When you see me in your mind , watching you

The way you used to hold my hand
that no one else could understand
The way you used to wink your eye
Now all my hopes have changed to fears
And all my smiles have changed to tears
What good would shouting be
So unreal to me , the feeling when you said goodbye
What can I do now

So please come back to me
Don't end this life of mine
Without you here with me
I know I'm gonna lose my mind

My tears are hurting me
Just what am I supposed to do
When you see me in your mind , watching you
Watching you
