Time and time again I go to bed  
Thinking when the moment's gonna come  
And it's just you and me with our hearts beating fast  
Look to explore, our souls ready to soar  
Higher and higher we go  
Over and over we roll  
In this fantasy that sets us free baby you and me  
We're living out our wildest dreams  
In this fantasy feels like extasy I only wish baby  
It was reality  
Ooh, Ooh  
Night and night I dream we're one the phone  
Telling me she wants to fill my needs  
And it's me that you crave while whispering to me  
A star you wanna be, in my fantasy  
Deeper and deeper we go  
Over and over we roll  
In this fantasy that sets us free baby you and me  
We're living out our wildest dreams  
In this fantasy feels like extasy I only wish baby  
It was reality  
Ooh, ooh  
I wanna be the one that you come to when you're in  
need  
I wanna be the joy that ou know sets you free  
I wanna give you loving that's burning so deep in me  
And maybe one morning it's your face that I'll see  
In this fantasy that sets us free baby you and me  
We're living out our wildest dreams  
In this fantasy feels like extasy I only wish baby  
It was reality
