You're dead set against killing

You'll never go to war

Peace in our time is thrilling

But your reality door is closed

If you should decide to resist the draft

That's you God given choice

Why go thousands of miles away to kill someone with
no voice

But think about this as it's said

If their soldiers came here, you'd be dead

Bullets are faster than words

Home defense to keep our peace seems logical in our
times

Keep what's yours, it wasn't free

Or be subjected to a foreign crime.
