"The Kids Are The Future"

Visit "[The Kids Are The Future](#)" on MotoLyrics.com

Let's teach them well let's teach them wise

Make sure we teach them not to lie

Tell them all that they need to know

Tell them now, and let's not be slow

Teach them truth and advertising

Because they're seldom hand in hand

Right now they're selling presidents

Let's make them understand that the kids

they are the future

Tell them picture tubes are our tools

don't be taught logic don't be taught rules

Make sure they're never theirs,
question them always don't question your fears

Teach them to write a letter, a cry

Hey joe president I don't wanna die

Tell them all that they'll need to know

Keep the ball rolling, c'mon let's go.
