Are you hearing me?

This is the greatest feeling that I've ever known
Is this your weak heart beating like a sonnet? Boy, I'm
taking you home
You got no real reasons for taking me back
Come a little closer baby, don't have me catch you
running away

Make him happy
Make him sad
Make him feel
Make him love

I kissed him on the cheek
He looked away from me
I know you want me near
But I'm better this way
So goodbye
They have the home I need
To fix my memory
I know you want me near you
But you've got to go

So tell me now
Would you wanna live life if you could never let love
close to you
Yeah you must be high from all the lies of love and
trust
they've fed to you
You got no feelings for these things I feel so true
I don't need it, hate feels better than love
Give it up, let the pain start filling you up

Make him happy
Make him sad
Make him feel
Make him love
(Oh I've been searching around in the dark for so long
and I've finally found me a place where I'm not alone)

I kissed him on the cheek
He looked away from me
I know you want me near
But I'm better this way
So goodbye
They have the home I need
A kind of remedy
I know you want me near
But I think I'll stay
So goodbye
So goodbye
So goodbye
I've had enough of you... and with all the aching...

I kissed him on the cheek
He looked away from me
I know you want me near
But I'm better this way
So goodbye
They have the home I need
Love is a remedy
I know you want me near
But I don't wanna change
So goodbye
I kissed him on the cheek
He looked away from me
I'm trying to tell you something
That i never could say
Oh goodbye
They have the love I need
I keep it warm in me
I know you want me near
But I'll never be safe
So get off

Don't be coming for me, coming for me
coming to the world I love now
World I love you...
I love you...
I love you...
