First you didn't come out you called it another phase  
Come on come out  
Now you've hidden so deep I can't find you anywhere  
Come on come out  
You didn't call out for me again  
You didn't, you didn't call out  
And I've never felt so alone

So strange...it's always the same

Oh when did you become  
So cold and far away  
You exist inside me  
Oh empathy is ours  
Don't you break away because  
A chemical in me is all you will be

Have you bitten yourself a scar that you can't repair  
Come on come out  
There's no reason to think you can't fly with broken  
wings  
Come on...come out  
I know that you can't hear the serenade  
You've locked yourself somewhere I can't locate  
Can barely feel you crawling under my skin

So estranged...don't want you to fade away

Oh when did you become  
So cold and far away  
You know you exist inside me  
Oh empathy is ours  
But don't you break away because  
A chemical in me is all you will be
