Inject the seas with toxic rust (started deleting, started deleting)
Sky couldn't breathe from all the dust (started deleting, started deleting)
Cover the green in concrete mud (started deleting, started deleting)
Animals caged in iron and glass (started deleting, started deleting)

Should change your way
They built it up now I see it falling, falling
They built it up, built it up

Sometimes you're unaware that the feeling hasn't been that good
And the world is unwell, you should treat her like you should
I suppose if you were erased the purity would be restored
To a time when everything way beautiful

Infected genes that filled their hearts (started deleting, started deleting)
Suddenly needed things that they lost (started to need it, started to need it)
Covered in greed their eyes were shut (started deleting, started deleting)
Man didn't see him fading out (started deleting, started deleting)

Should change your way
They built it up but now I see it falling, falling
They built it up but now I see it

Should change your way
They built it up but now I see it falling, falling
They built it up, built it up

Sometimes you're unaware that the feeling hasn't been that good
And the world is unwell, you should treat her like you

should
I suppose if you were erased the purity would be
restored as before
Sometimes you're unaware that the feeling hasn't been
that good
And the world is unwell, you should treat her like you
should
I suppose if you were erased the purity would be
restored
To a time when everything was beautiful

Started deleting, started deleting...
Talk to me, talk to me...
Do what you know, know what you need...
