

## Fake "Lemontune"

Visit "[Lemontune](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I had a bad day like I've never ever had  
So I made a quick call to the devil in my lamp  
And he wants me to be this way  
And he wants me to be that way  
Oh my lordy!

Bad boy invites you to be yellow

Gotta stop me moving but I just can't stop  
Ticking and a clicking like a broken clock  
Our time is your time  
Get on the dance floor

Fat boy (dance mutherfucker)  
He's shaking it to the beat (come on, come on)

Surfing on (a lemon)  
All your brainwaves  
Sun in skin  
Dry your everything

So sweet  
Let the taste surround you now  
Join me  
And we can come together now  
All we all need : loving, loving

Sometimes I need a new degree  
One time I saw a helium  
Hard time candy swallowing  
No time to ever get too  
Lonely, lonely  
Call me, call me

Bite it it's all that you need to know  
Drive it it's somewhere you need to go

Man on moon (a lemon)  
I'm just floating here for you  
Clear blue skies (a lemon)  
Mixed with ocean blue

So sweet  
Let the taste surround you now  
Join me  
We can come together  
All we all need : loving, loving

Sometimes I need a new degree  
One time I saw a helium  
Hard time candy swallowing  
This time I'm taking everything  
Slowly, slowly  
Hold me closely

If you ever need to feel it  
Just sing the lemontune  
It could be the sweetest flavour  
If you open up your head  
If you need someone to take you  
Just call me out again  
And I know life's not that easy  
But it doesn't have to be hard  
When all that's left is the moment  
We'll make the moment ours  
If it becomes time to be going  
Just take the feeling home  
And then we'll come back again tomorrow
