Novocaine don't leave me now
Novocaine stick around
Don't try and find an easy out
Novocaine don't ask me how I got so naive
Climbing but I'm always on the floor

Novocaine won't you stay?
Novocaine keep me safe
Everytime I call out to you I wonder where I've gone

Novocaine don't ever hide
China doll is on your side
You calm me 'til it's peaceful in my world
You take it all with you and bring snow and glitter
Venus whispers and everything is warm
Climbing but it's always on the floor

Novocaine won't you stay?
Novocaine keep me safe
Everytime I call out to you I wonder where I've gone

Everything I do is a mess
Keep me dressed up in that burlesque
Take me to see me in the past
Tell him what it was I became

Somet hings are never gonna change
It's all too late now, it's always too alte for me
Keep me safe for me
Keep me safe...

Novocaine won't you stay?
I'm never here anyway
Novocaine answer me
Novocaine won't you stay?

Close the door, don't go outside...
