Better sink, better think under all of your covers
You need the time to recover
Take the time to unwind or I know that you'll fall back
Into the flame that burned you
Maybe all you need is so much closer than where it
seems to be so
Make your bleeding heart beat so much faster forever
after

All you've ever been will make you flutter and gleam
Don't be afraid child

Better feel and reveal under all of your covers
This is the time to discover
Change your skin, grow a wing or I know that you'll fall
back
Into the flame that burned you
Make your bleeding heart beat so much faster
It's real if you believe it

Who follows who forever after
Far above into the starlit ocean
Who follows who forever after
I'm gonna fly home and find her
Who follows who forever after
Far above into the perfect ocean
Who follows who forever after
I wanna find out about her

It's making you flutter

Who follows who forever after
Far above into the starlit ocean
Who follows who forever after
I'm gonna fly home and find her
Who follows who forever after
Far above into the perfect ocean
Who follows who forever after
I wanna find out about her
