

Fake Figures

"as we drift"

Visit "[as we drift](#)" on MotoLyrics.com

All these things fade
into what is known
as the chemistry of life
and then dissolves
I cannot find
the door in this light
cause it's too dark
within my eyes

no i can't say just where we've been
no i can't say just where we are going

ahhhhh
ahhhh

as we drift out
beyond good reach
the wires begin to fray
and slowly fade away

no i can't say just where we've been
no i can't say just where we are going

but as soon as you arrive bring me all of your faces

your heart is an angel when its numb
reasons don't mean a thing
and i can hardly think
