Today a group of women came to see me  
To convince me women don't have equal right  
And they left when I told them I feel equal to an angel  
While my man holds me at night

My man he treats me like a lady  
And he's gentle as a gentleman can be  
So I do everything I can to please him  
'Cause my man works hard and takes good care of me

Don't liberate me just love me 'cause I'm as free as I  
ever thought to be  
Don't liberate me just love me some women can't  
understand  
There's more than one difference in a woman and a  
man  
I'm convinced that's the way God meant it to be  
So love me and don't liberate me
