"He Talks to Me"

Visit "[He Talks to Me](#)" on MotoLyrics.com

He may not ever be a lady's man
Maybe his caloused hands
Have been too long in the sun

But he would always be the one I loved
Cause he's stikll done what knowone's ever done
And it means more to me than he will ever know
Cause words can never say how much I love the way
He talks to me

It does my heart good to hear him talk to me
The way I understood
He can ease my frustration
With his soothing conbersation
And I love the way he's not afraid to talk to me

(Piano break)

Now you can talk about the finest things
Big cas and diamond rings that light up your life
But let me tell you that the finest thing
Is the joy he brings when we turn out the light
And in those moments after we make love
That's when he holds me close
and I gives me what I need the most

He talks to me
It does my heart good
To hear him talk to me
The way a lover should
He can ease my frustration
With his soothing conversations
And I love the way he's not afraid to talk to me
Oh I love the way he's not afraid to talk to me
