Prepare your planet for a major invasion,  
We come sponsored by the coca-cola co'peration,  
Some headline news for you...  
We got grenades that look like...

Meteorites light up the night,  
Meteorites you're all gonna die!  
Meteorites light up the night,  
Meteorites fall out of the sky!

Our heads are big,  
And we're an alien nation!  
Better get on your knees,  
Pray for divine intervention!

You've got your lives to lose,  
We've got grenades that look like....

Meteorites light up the night,  
Meteorites you're all gonna die!  
Meteorites light up the night,  
Meteorites fall out of the sky!

Here we go....

Ooooooooooh meteorites!
