Music: A.Bulgaropulos

Lyrics: A.Bulgaropulos, A.Geremia

Today it is quiet and peaceful  
Year 2045, life in the domes is easy  
Hermetically sealed,  
keeping mankind alive

The outer regions are poisoned  
The radiation's high  
Ashes and dust are falling  
Deadly heat, the planet is dry

Chorus:  
Hellish days, toxic and infectious times  
Atomic twilight outside  
Nuclear gods, you brought us here  
Dragging our world into fear  
Hellish days, atomic twilight outside  
It started just by testing  
Some new technologies  
Providing peace and balance  
Back in those years  
it did sound good to me

Now with the memories fading  
I can't remember too well  
But jealousy in our hearts  
Wiped out reason, security failed

Chorus

I went out again this evening  
To watch the violet night  
But my blind eyes don't see anything  
Time is up, I feel the cancer inside
