It's been long enough  
Now only sunshine could save me  
I've still been waiting for you  
Who will never come back again

I love you forever  
I can't live without you anymore  
I love you forever  
Your body is so cold and so hard  
Please come back

Sit beside a fire place  
I remember your warm heart.  
Memories filled with plenty of love  
And delight with my tears

I always love you  
I can't see your face with my tears  
Baby, I miss you

God, please don't take him far away from me  
I love you forever

I'm walking in the dark  
Is this a fog or tears?  
I can't see anything  
Where are you?  
I'm holding a piece of dream that you gave me

I love you forever  
I can't live without you anymore  
I love you forever  
Your body is so cold and so hard  
I love you forever  
Please come back  
I love you forever  
Please come back  
I love you forever
