# "The Past Is The Past"

Visit "[The Past Is The Past](#)" on MotoLyrics.com

I stand here with arms down  
Not heated, I've calmed down  
It's just I felt you slip away for me  
Like you didn't even know me

Oh, like you didn't even care  
About the life we build for us  
Only, only, only for us  
Only, only, only for us

Before you stand your ground what are you doing?  
'Cause everything around us will be ruined  
Again we'll have to search for what we had  
When the past is the past

It's just that it pains me  
To know that you don't feel me  
Through all mistakes that we had overcome  
I never thought this'd be the one

Oh, I guess this life will always have a way  
Of finding us at bay  
Like us, like us it fades away  
Like us, like us it fades away

Before you stand your ground what are you doing?  
'Cause everything around us will be ruined  
Again we'll have to search for what we had  
When the past is the past, when the past is the past

Before you stand your ground what are you doing?  
'Cause everything around us will be ruined  
Again we'll have to search for what we had  
When the past is the past

Before you stand your ground what are you doing?  
'Cause everything around us will be ruined  
Again we'll have to search for what we had  
When the past is the past
