

Taproot "April Suits"

Visit "[April Suits](#)" on MotoLyrics.com

How could you abandon me I thought you'd always be
There for me standing tall one and one for all
My support modeling rolling as a team
But instead on our own enemies of old

[Chorus:]

Season's change the fallen rain will wash the pain away
Make amends to help understand how to live today

FUCK!

It's not your fault I understand now I'm more a man

You needed space to find yourself and I'm in the same
place now

Living dreams dreaming news springing forward to
Choose a life to get me by not a life that passes by

[Chorus]

On we march our April suits
On we march in our April boots
On we fucking march in our April suits,
march in our April boots

[Chorus]
