Let me come
I'm taller than skyscrapers
Trembling
You've seen my eyes light up

Where the wind blows
Send me right there
Where the wind blows
Send me right there I am gone

Muscles tense
They've got love tangible
disagree
On everything in between

One day oceans dry up
(I will be that handshake when they goodbye to you)
we get sand in our caps
(I will be that feeling in your stomach right then)
I admit indifference on the inside
(I will be that hole you punch into your wall tonight)
