Half past eight and you're late
Coffee's cold, what a state
They've dragged you down
Fate's got you scraped
Work to death
Can't you turn them words around

Is it really what you want?
Is it really what you need?
Is it really what you choose?
[REPEAT]

The world is in your hands
The world is in your hands
The world belongs to those of us
Who still believe we can
And it matters what you do
Though they all look down on you
Cos it's better that you've come from nothing
Than nothing comes from you

Come with us (come with us), come with us (come with us)
Join with us (join with us), join with us (join with us)

Don't make a sound
Count your pennies, count your pounds
There's no way out
What will you do when all love gives up on you
Can't turn around

Is it really what you want?
Is it really what you need?
Is it really what you choose?

The world is in your hands
The world is in your hands
The world belongs to those of us
Who still believe we can
And it matters what you do
Though they all look down on you

Cos it's better that you've come from nothing
Than nothing comes from you

Come with us (come with us), come with us (come with us)
Join with us (join with us), join with us (join with us)

We've got a place and it's here for you
Though all we ever wanted was a different view
I never knew somebody live with so much pain
If you open your heart
Come with us and we'll take you away

Ring ring, beep beep uh-huh
Ring ring, beep beep uh-huh
Ring ring, beep beep uh-huh

Come with us (come with us), come with us (come with us)
Join with us (join with us), join with us (join with us)
