[Mystic]

Forget a long introduction here to check ya'll for a moment  
As of now, you are officially my non opponent  
That position you got you like it huh (keep it)  
Seen the garden that you got and I would never wanna reap it  
And the house you built that's some real pretty glass  
And your image is alright but I can still see your mask  
And folks is askin is my life complicated cuz' it took so long  
To get this wax created but ya'll know  
I just been payin' my dues  
Feet on the ground, head in the clouds a bit confused  
As to when 'n how the house built fell down  
Why ya'll more about the money than the texture and sound  
But astoundingly everything's 360  
It was all about you but now the true heads with me  
So, go on ya'll keep playin the role  
Cuz when the heavens made me they broke the mold

[Mystic]

Yo boo, what's your budget, did you top a mill?  
Give up half your pub, that's a fucked up deal  
And it's almost funny but not really  
Shoulda studied the biz 'stead a tryin' to be pretty  
And them cat's who write your rhymes give 'em my respect  
It's damn near a crime that doe changes credits and edits  
Monthly mags and reviews  
they did a good job couldn't miss 'em pimpin you  
And them song you on how much you say you see?  
I might get 1% of that and still flow for free  
But, I'm a goddess with a true school foundation  
You got a bowl of poison tryin feed the nation  
I feel your hesitation on relatin' to me  
If you skippin' this track you not hatin' on me

You just havin' a moment where my world's to bright  
but you supposed to do that it's only right

[DJ Revolution Scratches Various Samples]

[Mystic]

Current events, current things current swings  
Only a few emcees really got that thing  
You know, God given, not man created  
Make you smile out loud 'cuz the beauties so naked  
And that's demonstrated in everything I do  
The company I keep (who you with?) Du  
But back to you, ain't even got no malice  
Hope you find the missing pieces to your childhood  
palace  
Personally I think you dyin' inside  
Cuz we all born dreamin' with the truth in our eyes  
But you, misplaced it the sickness i taste it  
Should walk you through the gallows so you future you  
could face it  
Understand I just call 'em how I see 'em  
I'm into real facts with real logic and reason  
And beyond a single shadow of a doubt  
I'm just better than you and now the word is out
