They said I could never do it, I would never stand up,
I'd never survive it, but I don't care what they say,
I'ma do it my own way. And if these people can't handle
the way I do me,
I won't have to answer I'd finally be free, they say I
should do how they
say,
but I'ma do it my way.

This is my life, this is my way,
This is my strife, this is my day
I'm still doing me, fuck what they say
I only live once so I'm living, no play

I do me, so homie do u
I look for the real but I find very few
They look for a fake but I always keep it true
They talk on my life, like they really new

My struggle, my love for the game
My money, that comes along with the fame
My status, the brings value to my name
And all the people who changed while I remained the
same

So let me live life cause I know I live it right
Ill make it to the top, never scared to fight
I focus on the day though I'm living in the night
Always chasing dreams and never losing sight

They said I could never do it, I would never stand up,
I'd never survive it, but I don't care what they say,
I'ma do it my own way. And if these people can't handle
the way I do me,
I won't have to answer I'd finally be free, they say I
should do how they
say,
but I'ma do it my way.

I cant make it?, watch me prove u wrong
If it's a new day, then it's a new song

Ill will be a king, u can call me king Kong
My name will be in shining lights, right where I belong

Never listen when these haters try to bring u down
Kill every city, yeah, own every town
When I'm on the top they'll be looking like a clown
Ill be looking like a king, flossing on my crown

Always making moves, dropping while its hot
Everything I am is exactly what your not
I've earned every title, took every spot
I deserve the throne cause I give it all I got

My eye is on the prize, true I'm life living fast
I always know the motive, its all about the cash
U live life, and ill live it right past
I'm Aiming at the sky, foot pressing on the gas

They said I could never do it, I would never stand up,
I'd never survive it, but I don't care what they say,
I'ma do it my own way. And if these people can't handle
the way I do me,
I won't have to answer I'd finally be free, they say I
should do how they
say,
but I'ma do it my way.
