The sound of the city, the city in me
The sound of the city in me
It's always the moon when they speak about love
Out in space it's just the cold hard fact
And it's always the moon, it's always the moon

The town in the city, the city in me
Away from the city and me
The hills are alive and the planets too
And Neil Armstrong never saw you
And it's always the moon, it's always the moon

Out in a trance, she walks, mostly, she talks, she walks,
she wonders, mostly
Mostly she talks, yeah
And it's always the moon, it's always the moon
