Now she was about seventeen
Just, young and fine
She had the kind of Kisses
That made you sad
She liked to flirt with me
Then act like she didn't know me
When her friends came around
But i didn't mind
'cause when her friends weren't around
Shorty and i would
Hang out kinda tight
Just sit up and
Talk

But one night
She wanted to see
How far it would go
Just how far
It could all go
But she couldn't Love me without shame
She only wanted me for one thing
But you can teach your boy to do that
Can you love me without shame?
I need you when i feel pain
And now
You want to fuck around
Now word had been gettin' around town
That shorty and i were
A little bit more than just friends
And she really wasn't
Feelin' that
So she stopped calling me
But one day i ran into her
She was hanging out with this young boy
That liked to take her out and buy her things
And you know how we confuse love
With buying people things?
Well, then she licked her lips
And whispered in my ear
She said, you know i've missed you
I said, cool

But when i asked her
What exactly was it that she missed
She said
Uh
Can't nobody eat my pussy
The way that you do

Can you love me without shame?
You only want me for one thing
But you can teach your boy to do that
Can you love me without shame?
Need me when you feel pain
But now
You want to fuck around

You want to fuck around
Yeah, you want to fuck around
You want to fuck around
You want to fuck around, with me
You want to fuck around
You want to fuck around
You want to fuck around, with me
Yeah, you want to fuck around
You want to fuck around, with me.
