Powerhead, A Powerhead
A Powerhead, A Powerhead

I'm choosing you to overblow
Your powerhead is loading red into explode
Do what I say, Not what I've done
You people listen if you want to live on

I should've missed you, But baby I dont
I should've missed you, But baby I wont
I shouldn't think that, You got something I need
I shouldn't think that, Something makes me bleed

You've got a will to love a need to be free

Powerhead, A Powerhead

I'm choosing you to overthrow
Your powerhead is loading red into explode
Do what I say, Not what I've done
You people listen if you want to live on

I should've shoot you, But baby I do
I should've take you, But baby its all love to you
I should've loved you, The way that I do
I should be with you, But baby I got to go back to school

Darkness on the land
The evil one and his darkened hand
Save me for the night
Save me for the day

I'm choosing you to overthrow
Your powerhead is loading red into explode
Do what I say, Not what I've done
You people listen if you want to live on
