Nothing too much, just out of sight
You say you love me if this is true
The best thing to do is to lie down beside me
I said I love you, well nothing too much, just out of sight

Oh, don't you wanna be fair?
When you went away in the twilight
It was alright, it was alright, alright

I said I love you, I thought you knew
The last thing to do was to try to betray me
The new morning light I'll never forget it
Much just out of sight

Twilight out of my sight
I was more than upset
Nothing too much, alright

I can remember your beautiful hair
I can remember, why can't you take me there?
Don't you try betray me, oh wanna betray me?
I was ready to test, I was ready to test with the whites of
your ribs

Nothing to haunt me, check if it's alright, alright
No nothing too much, just out of sight

Well, nothing too much, just out of sight
[Incomprehensible] beautiful hair
[Incomprehensible] in the moonlight
In the twilight of the last night
It was alright, alright, alright

Well, nothing too much, it's alright
Just out of sight
The last thing to do was to try to betray me
