How much is enough?

Good enough, is not good enough

Don't complain that you've got it tough

With all you have, your life's a bore

Can't relax, you want so much more

Blind needs won't set you free

Can't you see that time is slipping away? But I got to say

How much is enough? When your soul is empty

How much is enough? In the land of plenty

When you have all you want and you still feel nothing at all

How much is enough, is enough

Gravity may bring you down

But harmony could spin you 'round

Information ariel says buy buy buy material

Give take all day long

Can't you see it's hopeless being strong

When you live it wrong?

How much is enough? When your soul is empty

How much is enough? In the land of plenty

When you have all you want and you still feel nothing at

all

How much is enough? How much is enough?

Buy buy buy, buy buy buy

So give me your attention, I know it's getting late

While we were dreaming, something slipped away

We're drowning in possessions, playing tricks with our
minds

Lost from one another, baby put your hand in mine

Time is slipping away, but it's not too late

How much is enough? When your soul is empty

How much is enough? In the land of plenty

When you have all you want and you still feel nothing at
all

How much is enough?

How much is enough? How much is enough?

When you have all you want and you still feel nothing at
all

How much is enough? How much is enough?

How much is enough? How much is enough?

How much is enough? How much is enough?
