I was waiting on the moment,  
But the moment never came  
All the billion other moments,  
Were just slipping all away.

(I must have been drifting) we're just slipping all away  
(Just ego tripping)

I was wanting you to love me  
But your love it never came.  
All the other love around me  
Was just wasting all away.

(I must have been tripping) was just wasting all away  
(Just ego tripping) was just wasting all away  
(Must have been tripping)

I was waiting on the moment  
But the moment never came  
(must have been dreaming) but the moment never  
came  
(just ego tripping) but the moment never came  
(must have been tripping) but the moment never came  
(just ego tripping) but the moment never came  
(must have been dreaming) but the moment never  
came

But the moment never came.
