

Flaming Tsunamis, The "If You Really Love Me"

Visit "[If You Really Love Me](#)" on MotoLyrics.com

baby, baby, this might seem kinda crazy
but lately you don't get my blood racing
you used to get my blood pumping
but in my mind there is something
no it's nothing you said
but the only cure is inside your head

I know your in there, I know your in there

If you really love me, let me eat your brains
If you really love me, let me cause you pain

closer than ever together we'll eat each other's brains
dinning forever our love will never be the same
small price to pay to escape romantic atrophy
one big bite and you'll be just like me

I know you're in there, i know your in there

If you really love me, let me eat your brains
If you really love me, let me cause you pain

If you really love me, let me eat your brains baby
if you really love me, we should be the same
if you really love me, let me eat your brains
if you really love me, let me cause you pain
